

Application Serial No. 10/691,771  
Response dated November 23, 2005  
Response to Office Action of September 20, 2005

**LISTING OF CLAIMS**

1. (Previously Presented) Sunglasses for use both in sports and casual activities, comprising:

a frame shaped to fit a wearer's face having an inner surface, an outer surface, a lens mounting surface for mounting a lens means for protecting a wearer's eyes, at least one lens mounted on said lens mounting surface, a nose bridge for supporting same frame on said wearer's face, a temple bracket on each side of the frame for attaching a means for supporting the frame on the wearer's head; and

a removable sealing member comprising a resilient member and a gasket member, the resilient member having a front surface formed to closely engage the inner surface of said frame, a rear surface, one or more ventilation openings, and one or more fasteners for removably attaching the front surface of the removable sealing member to the inner surface of the frame, the gasket member covering the one or more ventilation openings.

2. (Previously Presented) The sunglasses of claim 1 said gasket member comprises air permeable foam.

3. (Previously Presented) The sunglasses of claim 2 wherein said foam gasket member is a wraparound foam gasket.

4 - 6 (Canceled)

Application Serial No. 10/691,771  
Response dated November 23, 2005  
Response to Office Action of September 20, 2005

7. (Previously Presented) The sunglasses of claim 1 wherein the lens mounting surface defines two apertures, one for each eye of a wearer, each of which is covered by a lens.

8. (Previously Presented) The sunglasses of claim 1 wherein the lens mounting surface defines one aperture for both eyes of a wearer which is covered by a single lens.

9. (Previously Presented) The sunglasses of claim 2 wherein said removable sealing member includes one or more ventilation openings along a periphery, said ventilation openings covered by said foam gasket to prevent the ingress of particulate matter.

10. (Previously Presented) The sunglasses of claim 1 wherein said means for supporting the frame to the head of the wearer comprises a temple bar hingedly mounted to the rear surface of each temple bracket, said temple bar shaped to fit a user's head in a region above and behind a user's ears.

11. (Previously Presented) The sunglasses of claim 1 wherein said means for supporting the frame to the head of the wearer comprises an elastic strap having a first and a second end, said first end removably mounted to a first of said temple brackets, and said second end removably mounted to a second of said temple brackets.

12 – 20 (Canceled)

21. (Currently Amended) Sunglasses for use in sports and casual activities, comprising:

Application Serial No. 10/691,771  
Response dated November 23, 2005  
Response to Office Action of September 20, 2005

a frame having an inner surface, an outer surface and at least one lens mounted therein;  
and,

a removable sealing member comprising a resilient member and a gasket member, the  
resilient member having a front surface formed to closely engage the inner surface of said frame,  
a rear surface, and one or more fasteners for removably attaching the removable sealing member  
to the frame, wherein said gasket member covers at least a portion of said rear surface for  
engaging a wearer's skin, wherein the frame is constructed to be worn both with and without the  
removable sealing member.

22. (Previously Presented) The sunglasses of claim 21, wherein said gasket  
member comprises thin silicone membrane.

23. (Previously Presented) The sunglasses of claim 21, wherein said gasket  
member comprises open cell air permeable foam.

24. (Previously Presented) The sunglasses of claim 21, wherein said gasket  
member comprises closed cell non-air permeable foam.

25. (Previously Presented) The sunglasses of claim 21, wherein said gasket  
member further comprises a fleece covering.

26. (Previously Presented) The sunglasses of claim 21, wherein said gasket  
member comprises a laminate of open cell foam, closed cell foam and a fleece covering.

27. (Previously Presented) The sunglasses of claim 21, wherein said gasket  
member comprises a flexible semi-rigid member.

Application Serial No. 10/691,771  
Response dated November 23, 2005  
Response to Office Action of September 20, 2005

28. (Previously Presented) The sunglasses of claim 21, wherein said gasket member comprises a screen material.

29 – 31 (Canceled)

32. (Previously Presented) The sunglasses of claim 21, wherein said removable sealing member comprises one or more ventilation openings therein.

33. (Previously Presented) The sunglasses of claim 21, wherein the lens mounting surface defines two apertures, one for each eye of a wearer, each of which is covered by a lens.

34. (Previously Presented) The sunglasses of claim 21, wherein the lens mounting surface defines one aperture for both eyes of a wearer which is covered by a single lens.

35. (Previously Presented) The sunglasses of claim 21, wherein said one or more fasteners for removably attaching said sealing member to said frame comprises at least one member at both ends of said sealing member and at least one member proximate the nose bridge portion of said sealing member.

36. (Currently Amended) Sunglasses for use both in sports and in casual activities, comprising:

a frame shaped to fit a wearer's face, said frame having an inner surface, an outer surface, a pair of orbital openings for surrounding the eyes of a wearer, a nose bridge connecting said pair of orbital openings, a lens mounting surface mounting a lens within each orbital opening, a

Response to Office Action of September 20, 2005

temple bracket on each side of the frame for attaching a means for supporting the frame on the wearer's head; and,

a removable sealing member having a pair of orbital openings connected by a nose bridge, the removable sealing member comprising a resilient member and a gasket member, wherein the resilient member comprises a front surface formed to closely engage the inner surface of said frame, a rear surface, and attachment means for removably attaching the removable sealing member to the frame, the gasket member covering at least a portion of the rear surface of the resilient member for engaging a wearer's skin, wherein the frame is constructed to be worn both with and without the removable sealing member.

37. (Currently Amended) Sunglasses comprising:

a frame constructed and adapted to maintain a lens therein; and,  
a removable sealing member constructed and adapted to be removably attached to the frame, the sealing member comprising a resilient member and a gasket member, the gasket member covering at least a portion of a rear surface of the resilient member for engaging a wearer's skin proximate the eyes, wherein the frame is constructed to be worn both with and without the removable sealing member.
